7.03 Problem Set 1 - Massachusetts Institute of Technology

1 7.03 Problem Set 1 Answer Key 1. Imagine a natural compound called Spindlestop, which shows promising anti-tumor activity. The primary source of Spindlestop is the bark of an endangered species of tree, but suppose that the yeast *S. cerevisiae* is found to produce Spindlestop in minute, yet detectable, quantities. To increase

7.03 Problem Set 1

7.03 Problem Set 1 Solutions 1. a. Crossing each yeast haploid mutant to wild-type will tell you whether the mutation is recessive or dominant to wild-type. If the diploid is wild-type phenotype, then the mutation is recessive to wild-type. If the diploid is mutant phenotype, then the mutation is dominant to wild-type.
