The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible.

Beck Hopelessness Scale Questionnaire

The Beck Hopelessness Scale (BHS) is a 20-item self-report inventory developed by Dr. Aaron T. Beck that was designed to measure three major aspects of hopelessness: feelings about the future, loss of motivation, and expectations. The test is designed for adults, age 17–80. It measures the extent of the respondent's negative attitudes, or pessimism, about the future.

Beck Hopelessness Scale - Wikipedia

The Beck Hopelessness Scale (BHS) is a questionnaire in which a patient answers "true" or "false" to a series of 20 statements that test his or her feelings about the future. The purpose of completing the questionnaire is to determine the likelihood that a particular person will attempt suicide.
