The four-cylinder 2.0 TDI was the biggest culprit, emitting more nitrogen oxides than allowed, tens of times over the certified amount. 74 photos EA288 is the codename of this powerplant, and...

Dieselgate What Now? Volkswagen Improves the 2.0 TDI ...

The only engine we are aware of that doesn't use the balance shaft module is the 110HP 2.0 TDI(CBDC). Luckily enough there is a solution, for the PD and CR engines. It is replacing the balance shaft module for a chain driven oil pump as seen in other TDI engines.

VAG group 2.0 TDI 140, 170 BHP engine guide

The difference was the length of the axles. The tdi 04 and 05 passats also used that flange. I believe even the later 01 or 03 and up 4 cyl passats used that flange. You may need to take 2 cv axles and have a drive shaft shop cut and weld 2 together then balance to make the inner and outer cv axle that you need.

2.0 TDI CR Bug! 240hp+ stand alone ECU from Boxeer ...

"The new TDI 2.0 Industrial Engines" (PDF), mi-uk.com, Volkswagen AG, April 2007, archived from the original (PDF) on 14 July 2011 2.0 R4 16v TDI PD 103-125 kW. Some models are fitted with a diesel particulate filter. According to Audi (UK) 'TDV' stands for Technology Development Vehicle.

List of Volkswagen Group diesel engines - Wikipedia

Another way to beef up the power in your CR TDI is to swap the stock turbo, a CR140, for the CR170, a larger turbocharger used in the european diesels. This upgrade is relatively simple, but it does require deleting the low pressure EGR and blocking off a EGR port on one side of the turbo.

2.0L TDI Performance Upgrades - Diesel News, Info and Guides

Engine: 2.0 TDI CR This 148bhp TDI is the pick of the engines. It's much punchier than the lacklustre 1.6 TDI and is actually cheaper as a company car, thanks to better CO2 emissions. It comes with...

tdi(s): 2.0 tdi cr swap always for sale About to install the fresh custom made 9lbs Flywheel onto the CUAA engine! Along with the 700HP sintered South bend clutch setup.

2.0 TDI CR Bug! 240hp+ stand alone ECU from Boxeer ...

Passat 2.0 TDI. 24 May 2013. #2. CR is superior in terms of allowing the ECU finer control of fuel timing. The PD engines create fuel pressure using camshaft driven pumps - one per cylinder. This apparently puts HUGE strain on the camshaft drive mechanism. CR engines use a common high pressure pump - this is not timed at all.

PD vs CR engines | TorqueCars Car Forums

For the 2.0 TSI petrol, along with the 105 and 125 kilowatts (143 and 170 PS; 141 and 168 bhp) 2.0-litre Turbocharged Direct Injection diesel engines, these use two SMICs, one below the left and right headlamps.

SEAT Exeo - Wikipedia

The 2.0 TDI is a very widely used Audi engine, present in most Audi models. The engine benefits from high fuel economy and above average performance. This motor was even present on the MK2 Audi TT. Early models of the 2.0TDI have some issues, so it's better to stay away from pre-2007 year examples.
